

Company Overview

August 2009

Three-E

Three-E operates in Libya servicing the energy industry with Oilfield, Engineering and Environmental Services. We are a multidisciplinary organization capable to offer effective “fit for purpose” or “regulatory” solutions to our client needs.

Our activities in Libya are benefitting of the technical, operational and scientific support of international companies operating in Europe, USA, North Africa and Middle East, with a wide variety products and services oriented to the Energy sector.

DWM & RigSite - Industrial - Marine – Engineering - Training - Rentals - Sales are among the several lines of services for the Oil and Gas E&P activities that we can provide.

Through our networks of partners and with our own internal resources we are capable to design and develop services tailored to specific customer requirements.

Our workshop in Libya can build and repair steel vessels, baskets, tanks, skips. Our international partners including major shipyard are able to provide customer designed equipment including offshore installations.

We are equipped to supply electro-mechanical industrial maintenance, civil works, grit blasting, painting, overhauling of various equipment including heat exchangers, as well as customer tailored ITC and security solutions.

Our field of activities includes also detection, reduction and containment, collection transportation and treatment of contaminants for the energy sector and for industrial applications. We can design and manage waste facilities, treatment platforms, built on purpose.

Our activities are performed on rig site locations, industrial plants, open sea, land and coastal areas and include: Management-treatment-recycling and disposal of rig site and industrial wastes; Monitoring, prevention and remediation of pollution; Transboundary movement of hazardous wastes accordingly to ADR Basel convention; Tank cleaning and hazardous tank reclamation with proprietary technology; Power plants and Oil&Gas plants maintenance works; SCADA supply, installation, testing, maintenance & troubleshooting; Harbour and coastal dredging; Marine surveying; Underwater works & ROV operations; Offshore installation maintenance; Overhaul & re-certification of liferafts and lifeboats; Fire prevention system design installation and maintenance on offshore and land installations; Flares engineering, erection, maintenance, revamping; Environmental engineering; Training; Rental of equipment and machineries for environmental protection; Rental of Drilling and completion strings, HWDP, tubing, wash pipes. Sales of drilling equipment and OCTG.

We adopt multi-disciplinary approach to create and deliver to our customers technically and environmentally sounding solutions. Our management team carefully analyses the project features, identifies potential hazards, evaluates consequences and provides engineering solutions to perform services safely and efficiently.

We are a real support to our customers for the many services we can provide proposing innovative solution with utmost concern to the environmental protection. Our group is extremely flexible in adapting to any single requirement and we are constantly looking for new partners bringing different experience and additional technology to the group.

Our Mission

Three-E is committed to provide its Clients with the highest Engineering and Environmental quality solutions and services balancing the operational and financial objectives of the client with applicable industrial and regulatory requirement.

Our Services

DWM & Rig Site Services

Drilling Cuttings Management
Liquid Mud Plant management
Solid Control Equipment Rental
Mud Dehydration / Closed Loop Systems
Waste Water Treatment
Waste Management stream: collection, disposal
Flare surveying, maintenance and revamping
Drilling, Geological, HS&E specialists consultants

Industrial Services

Power Plants

Power Distribution Projects
Heath exchanger regeneration & inner painting
Boiler Burners Management
Pre-commissioning

Waste Management

Waste segregation, collection, disposal
Mud/Sludge centrifugation, flocculation, dewatering
Waste de-hydration

Transboundary waste movement

NORM Management

Site surveying, assessment, measurement, classification
Compliant segregation, storage & monitoring

Environmental Reclamation

Industrial clean up, Polluted soils, Asbestos
Lagoons and pit reclamation

Gas & pollutant monitoring & detection

Hazardous substance mapping

Tank Cleaning

Sepracannon fluidization system
TEL TML tank cleaning as per Octel procedures

PCBs Management

PCBs storage & disposal
Transformers & Capacitors decontamination

Oil&Gas Plants Maintenance

Dynamic Simulation, Commissioning & Start Up
Material Management & Operations training
Fiber optic structural monitoring, fire and spill detection
Maintenance Engineering , Maintenance Services
Grit blasting, high pressure cleaning, painting

Flares management

Flares engineering, maintenance & revamping

Automation Control

Design & Sale of Automation Control Systems & Sensors
SCADA sale and installation & maintenance

Marine Services

Dredging

Harbour and coastal dredging
Bathymetric survey & dredged volume calculation

Offshore Installation HS&E Maintenance

Lifeboats inspection repair, maintenance & testing
Liferafts inspection & servicing
Fire fighting equipment and components

Geophysical & Environmental Surveying

Bathymetric survey multi/single beam
Topographic survey Total Station, GPS, DGPS & RTK
Environmental survey with sampling & analysis

Underwater works

R.O.V. (Remote Operated Vehicle)
Underwater inspection submarine gravity camera
Seabed sampling with grab / light gravity corer
Underwater building, repair & maintenance

Engineering Services

Environmental Studies / EIA
Environmental Management and Planning
Health & Safety Management
Geotechnical Engineering and Siting
Plant and Structural Engineering
Automation and Control Systems
Fiber Optic Engineering
On demand R&D and software development

Training

Plant Operations Training and Know-How Transfer
HS&E Training / ISO 14000 prequalification

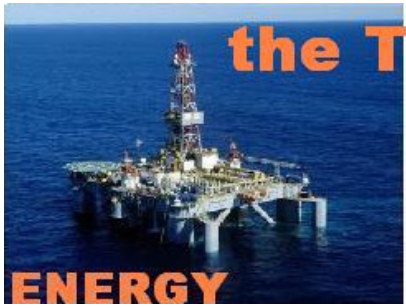

Rentals

Skips, mini containers, tanks, baskets
Drilling strings, HWDP, tubing, wash pipes, BOPs
Trucks, cranes, earth moving machines
Liquid Mud Plant

Direct Sales

Rig Parts and spares
Drilling Equipment, OCTG
HSE equipment, Washing equipment
On customer request

Our products & services are supported by ourselves and partner companies offering their experience, know-how and synergies for implementing best environmental & management practices. We also promote the technological transfer and the development of business opportunities among our partners participating in the venture.
